

Event Details: Everyone is invited to the next FREE meetup of our Information Systems Security Association Northern Virginia chapter (ISSA NoVa) Risk Management Framework (RMF) LifeBoat. ISSA NoVa membership is suggested for professional growth, but it is not required to participate in the meetup.

While the meetup's founding purpose was to discuss various implementations of the RMF guidelines, we are member focused. The meetup provides the opportunity for members to investigate any cyber security topic and present back their findings to engage in lively discussions with the membership. Most previous presentations can also be downloaded from our free RMF LifeBoat Google drive. Here are the three previous topics of the RMF LifeBoat meetings:

- 9 Mar 2019 – NIST RMF Webcast Extracts: A Flexible Methodology to Manage Information Security and Privacy Risk – Moderated by Tom Marshall
- 23 Feb 2019 – RMF and Blockchain, not so perfect together - Joshua Marpet
- 9 Feb 2019 – Cyber Security Risk Assessment & Attack Impact Analysis using Fuzzy Logic Inference Systems - Anil Lamba

The ISSA NoVa RMF LifeBoat meeting schedule is typically every two weeks on a Saturday morning, skipping three day weekends. The meetings are from 9:30 - 11:30am. One can arrive 30 minutes before and stay 30 minutes after the meeting (9am - 12pm) for professional networking. Our planned 2019 meeting dates are: Jan 26, Feb 9 & 23, Mar 9 & 23, Apr 6 & 20, May 4 & 18, Jun 1, 15 & 29, Jul 13 & 27, Aug 10 & 24, Sep 7 & 21, Oct 5 & 19, Nov 2 & 16, and Dec 7

Visit the meetup's web site for the current topic description, the presenter's bio, the meeting address, and simple logistics at URL: <https://www.meetup.com/NCR-Risk-Management-Framework-Lifeboat/>. You may join the Meetup to receive announcements and to RSVP on the Meetup site.

For those who do not wish to join the meetup community, please send an email to gingerdoetsch@gmail.com and you will be placed on the rmf.lifeboat@gmail.com blind copy distro list to receive meeting announcements. Non-Meetup members can RSVP for a meeting via this email address or by calling 703-402-4379.

Besides earning Professional Development Units (PDUs) for participating in our ISSA Northern Virginia Chapter (ISSA NoVa) RMF LifeBoat Group meeting, we all receive the encouragement and help we need for our cyber security professional growth. The friendly interactive presentations by our members of the meetup always lead to lively respectful discussions. Members always take away information that they can apply on the job in the following weeks! In addition, our LifeBoat Group meetings provide opportunities for the all-important professional networking we all cherish. If you have a

vexing cyber security problem, share with like-minded security professionals. They may have already successfully developed a way forward to resolve it.
